OITH - One In The Hand

Dating App Prototype

A clickable prototype for the OITH dating application, designed to demonstrate the core user experience of a quality-focused dating platform.

Quick Start

Simply open `index.html` in any modern web browser to view the prototype.

No server or installation required!

Features Demonstrated

Onboarding Flow
- Splash screen with brand introduction
- 3-step value proposition walkthrough
- Account creation with basic info
- Photo upload interface
- Preference settings (interested in, looking for, age range, distance)
- Subscription/payment screen ($10/month)

Match Discovery
- One match at a time (core differentiator)
- AI compatibility score display
- Profile preview with bio, interests, and photos
- Like/decline actions with swipe animations
- Detailed profile view

Match Success
- Animated match celebration modal
- Direct path to conversation

Chat Interface
- Real-time messaging simulation
- Quick reply suggestions (icebreakers)
- Message timestamps
- Online status indicators

Date Planning

- Date/time selection

- AI-powered venue recommendations

- Date confirmation flow

Profile Management

- User stats (matches, dates, response rate)

- Profile editing access

- Match preferences

- Settings and subscription management

Navigation

- Use the **bottom navigation bar** to switch between Match, Chats, and Profile

- Use **back buttons** to return to previous screens

- On the match screen, you can:

- **Swipe right** or press → to like

- **Swipe left** or press ← to decline

- Tap the **info icon** to view full profile

Design Philosophy

- **Warm, sophisticated palette** - Coral/terracotta accents with cream backgrounds

- **Typography** - Cormorant Garamond for display, DM Sans for body text

- **Mobile-first** - Designed as a phone app in a device frame

- **Smooth animations** - Transitions, swipes, and micro-interactions

Technical Details

- Pure HTML, CSS, and JavaScript (no frameworks)

- Responsive design adapts to screen sizes

- CSS custom properties for easy theming

- Touch/swipe support for mobile devices

- Keyboard navigation support

File Structure

```
prototype/ ███  index.html # Main HTML structure ███  styles.css # All styles and
animations ███  app.js # JavaScript functionality ███  README.md # This file
```

Browser Support

- Chrome (recommended)
- Firefox
- Safari
- Edge
